

# Info about Visa Requirements & Insurance Coverage

---

## Visa Requirements

Incoming staff from most non-EU countries are required to apply for a visa before arriving in Greece.

**It is advisable to initiate the visa application process as early as possible, as it may involve a significant amount of time.**

Please refer to the list of countries requiring or not requiring a visa on the website of the Ministry of Foreign Affairs of the Hellenic Republic: [List of Countries](#)

Participants should contact the nearest authorized Greek Consulate to obtain information on all necessary documents and the formal application procedure.

Information regarding Greek Missions worldwide can be found at: [Greek Missions](#).

One of the required documents is the **Invitation Letter and/or Acceptance letter** participants receive from our office after successfully submitting their Online application.

## Insurance Coverage

Participants must have adequate insurance coverage during their mobility period.

The insurance coverage **must include mandatory private health insurance** (Liability insurance and accident insurance are optional. Liability and accident insurances cover damages caused by the participant or to the participant during their stay abroad).

Additionally, participants may require **complementary private health insurance** in certain situations, such as repatriation or special medical interventions.

Apart from the aforementioned types of insurance, it is recommended (but not mandatory) to have insurance against loss or theft of documents, travel tickets, and luggage.
